

Dhananjay Nagare (Data Analyst)

9011711479

nagaredhananjay5004@gmail.com

Sangamner, Maharashtra

LinkedIn Profile

GitHub Profile

Experienced **Data Analyst** with 2.4 years of expertise in **statistical analysis**, **data visualization**, & **predictive modeling**. Skilled in **storytelling** with data, team coordination, & delivering actionable insights through **ETL & Exploratory Data Analysis (EDA)** processes. Proven ability to translate complex data into **customer insights**, craft detailed **reports**, & foster **collaboration in Agile environments** to drive strategic decision-making & boost business performance.

 Bachelors of Engineering: 2020
CGPA: 6.80
([Savitribai Phule Pune University](#))

 PG Program in Data Science & ML
([Certification Course](#))
([Data Trained Education Pvt. Ltd](#))

TECHNICAL SKILLS

Programming Languages: Python, SQL, ML

Data Analytics & Manipulation: Exploratory Data Analysis (EDA), Data Mining, Data Visualization, Data Manipulations, Data Extraction, Report Generation

Statistical Analysis: Mathematics & Statistics, Regression, Segmentation, Performance Tracking.

Advance Excel: Advance functions, Pivot tables

Version Control System: GIT

Data Science Toolkits: Scikit-learn, NumPy, Pandas, Seaborn, Matplotlib, **Selenium Web Scrapping**

Machine Learning: Predictive Modeling, Classification, Regression, Decision Trees, Random Forest, Naïve Bayes, KNN, K-means

Data Visualization Tools: Power BI

PROFESSIONAL EXPERIENCE

Data Analyst

Teleperformance, Mumbai, Maharashtra.

Sep 2024 – Dec 2024

- Developed **ETL pipelines** using Python & SQL to automate data extraction, transformation & loading, improving efficiency.
- Optimized **MySQL queries** for large datasets, reducing execution time & cost.
- Built **ML models** for data analysis & predictive insights, enhancing decision-making.
- Tested and validated ETL pipelines**, ensuring data accuracy, consistency & performance optimization.

Data Analyst

Flip Robo Technologies, Bengaluru.

Nov 2023 – May 2024

- Developed a **Python** solution to analyze **Excel** inventory data, identifying and reporting **28%** of year-unused data, optimizing inventory management & reducing costs by **15%**.
- Optimized **SQL** queries for large datasets to reduce query execution costs.
- Utilized **Power BI** for data visualization of customer data, effectively identifying frequent stock requests & unrequested stock, leading to a **25%** improvement in stock management efficiency.
- Managed **SQL databases**, handling both **relational** and **non-relational** data, optimizing integration, ensuring accuracy, & executing **ETL processes** using **Informatica** to consolidate & transform data.

Data Analyst

Fujitsu Consulting India Pvt Ltd., Pune

Jan 2022 – May 2023

- Executed comprehensive data pre-processing, **cleaning** & wrangling, **enhancing** data quality & accuracy by **25%** for more reliable modelling outcomes.
- Employed advanced data visualization techniques & analytical methods, resulting in a **20%** increase in actionable insights for informed **decision-making**.
- Applied **machine learning** algorithms to extract & communicate key insights for strategic business decisions.
- Developed & implemented predictive models for forecasting using **Python**, driving improved forecasting accuracy & strategic planning.
- Collaborated with cross-functional teams in an **Agile** environment, participating in **sprint** planning, **stand-ups**, & retrospectives to ensure timely delivery of data-driven insights.

PROJECT'S

Capstone Project – Crimes in India

[Colab Notebook](#) | [BI Dashboard](#)

- Data Integration & Analysis:** Collected & prepared data on demographics, GDP, & crime statistics. Analyzed correlations & trends using SQL to identify crime patterns.
- Clustering & Insights:** Applied unsupervised machine learning to classify districts into Sensitive, Moderate, & Peaceful categories, providing actionable insights & visualizations.

Credit Risk Analytics (BONDORA BANK):

[Colab Notebook](#) | [BI Dashboard](#)

- Objective:** Conducted exploratory data analysis (EDA) to identify factors influencing loan default risk. Analyzed client & loan attributes to enhance decision-making for loan approvals & risk management.
- Approach:** Utilized Python & SQL for data analysis, applied machine learning for risk assessment, & generated actionable insights to minimize financial losses while optimizing loan approvals.
